

Experts Guide to Mounting

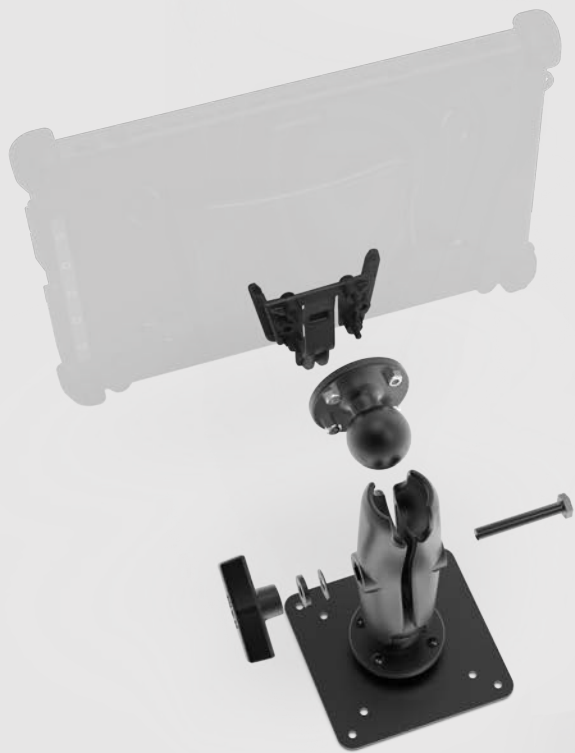

Mounting is in our DNA

Since our inception, MobileDemand has been mounting tablets across all industries and applications; increasing productivity by leaps and bounds for frontline workers.

Our mounting expertise provides businesses the ability to mount mobile tablets practically anywhere.

Mounting solutions for any business

Fixed Mounting

Forklift Mounting

Vehicle Mounting

Fixed Mounting

Designed for quick release, our patented snap mount system is the perfect tool if you need your tablet securely mounted to a wall, counter, dashboard or any fixed location one moment, but on-the-go the next.

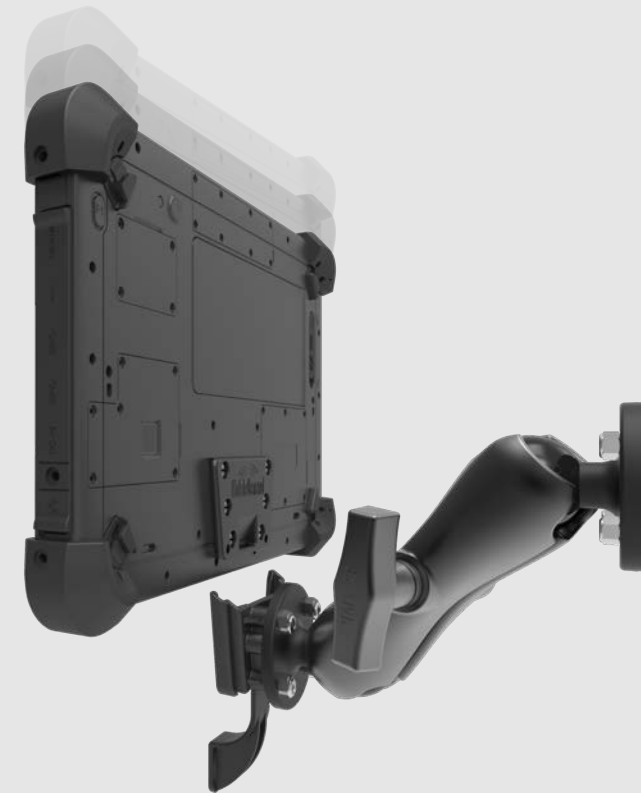

We also offer:

[Standard Wall Mount](#)

[Magnetic Mount](#)

Note: Older generation Flex10A and Surface Pro cases no longer have snap plate and rails.

[Snap Plate Adapter Kits](#) are available to modify the snap plates on either old cases or new cases to adapt to the snap rails.

Forklift Mounting

MobileDemand offers several options, including vibration-resistant tablet solutions that can be mounted directly to the forklift, powered via the onboard battery, and can connect to peripherals such as handheld scanners or full keyboards. Some of our tablets include the ability to enhance the WiFi connection by utilizing an external antenna. Several power options are available as well, including wiring a tablet dock to the fork truck battery or using XL battery packs.

Forklift mounting options:

Vehicle Mounting

We have customers in field service, transportation, law enforcement, public safety, and the food and beverage industries who use a tablet while they are out in the field. By adding a mounting option in their vehicle, they were able to increase their productivity. These mounts use MobileDemand's patented snap mount system so it's quick and easy to be on-the-go again in a matter of seconds. Here are a few examples of the solutions we can provide:

Standard vehicle mounts:

[Flex 10B, and Flex 10A with Android Tablets](#)

[Surface Pro / Go Bundles & Pro & Go Cases](#)

Questions to Consider

What are you mounting your tablet to?

This is probably the single most important question to ask yourself. Where you want to mount your tablet – in a car, truck, or on a forklift – is important to consider due to the amount of time and effort you can save with a properly mounted tablet. It is also an easy question to answer. After all, who knows what type of work you need to do better than you?

Where will your tablet be mounted and what are the climate conditions?

This pertains more to the tablet itself than the mount, but it is a vital question. Not all rugged tablets are created equal. Some are created for more specialized climates than others. Whether you're working in a freezer, out in the heat, or going from a freezer into the heat, there are tablets that can handle whatever rugged environment you work in. Knowing what you will put your tablet through will help us to figure out what the best tablet is for your needs and how to best mount it.

Do you need a direct power kit to charge your tablet?

Tablets have batteries – good batteries – but if you are going to operate the tablet all day while running multiple applications, a battery lasts only so long. This is easily solved by determining if you are going to use a [direct power source](#). There are many kinds, and we can help you find one to fit your needs.
